

Abstract

A novel composition for the treatment of skin and body infections, including rashes,
5 blisters, sore throats, and fungal invasions, that is useful for topical application to the
skin and throat and also for ingestion. Vinegar, baking soda, and wintergreen mint
comprise its main active ingredients. It is a suitable alternative to prescription and over-
the-counter remedies that are based on harmful substances such as steroids and phenols.
Additional ingredients include mints, sweeteners, and flavorings, which together relieve
10 the symptoms and eliminate the cause of skin and body infections.
